Site Network Licenses

Site network licenses require one site license plus as many seats for each module as you need to access concurrently. See below for a comparison between single user and site network licenses. Please contact [DesignBuilder sales](#) or your [local reseller](#) for a competitive quote.

Support

DesignBuilder email support is provided through our web-based Support Desk. New licenses come with free unlimited software support. Additional support to help with project work can be purchased in 1-hour blocks which are consumed as minutes of engineers' time:

Time (minutes)	Cost
60	€ 200

Single User vs Site Network

You can also choose between:

Single user

- Install and activate the software on 1 computer, transferable between machines.

Site network

- For multiple computers on the same network, you can have as many concurrent users as you have seats. A license server is installed on the network to manage the licensing.

Education

DesignBuilder is ideal for use in education because it is quick and easy to learn and allows the teaching process to focus on design and simulation issues. We have an active education programme to assist university departments in using DesignBuilder. To find out more see www.designbuilder.co.uk/education
